

# CURTAIN

## COLLECTION

Soundproof  
your space

Amplify  
productivity

Experience peace  
and productivity with  
our noise-reducing curtains.

“Through your office environment  
you are telling a story and  
you’ll decide how that story goes.”

Niek Renders  
CEO Drisag

## — CURTAIN SPECIFICATIONS

### WAVE

Our custom made curtains have a **wave shape**. To maintain the pleats, the curtains are always weighted down at the bottom with a lead cord.

For every meter you want to cover with a curtain, you’ll need at least 2,5 meters curtain. So the fabric will be at least 2,5 times longer than the rail you’re going to need because of the wave shape.

### RAIL

The aluminium rail will always be exposed. The curtain is attached under the rail. You can choose between a round or a rectangular curtain rail. The standard colours are white (RAL 9010) or black (RAL 9005).

The rail can be mounted on walls or the ceiling. If you have to be aware of sprinkler systems or lighting, you can choose to mount the rail with minisuspension hangers.

Our curtain rails are available in different angles and radii starting from 80 cm. Sharp corners are possible in radii 15, 20 and 30 cm.
