Movable Acoustiwall

design by Drisag

Product description

With this acoustic wall, you can divide spaces without actual walls. It's an ideal asset for multipurpose workplaces, brainstorm and meeting rooms. Because a quick sketch is done quickly. Moreover, this wall can be taken down at one place and assembled again at another without causing damage to your floor or ceiling.

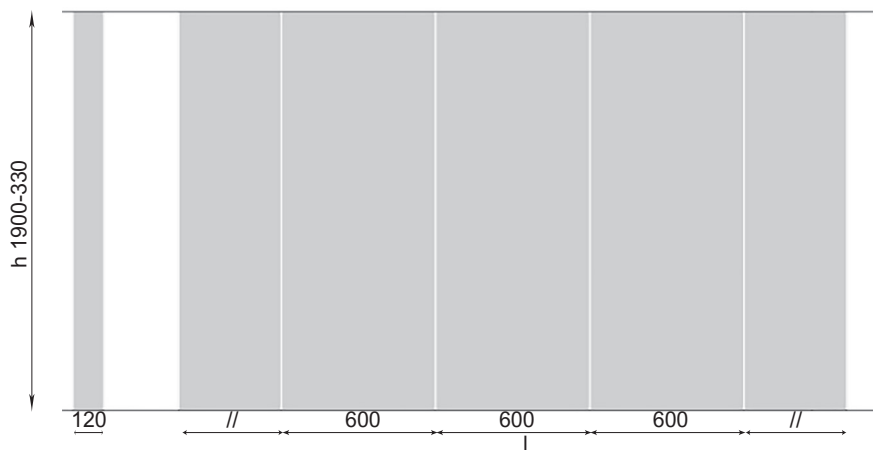

Technical information

The wall consists of galvanized profiles (thickness 0.8mm) covered with upholstered panels on the front, back and sides. These panels consist of MDF (thickness 4mm) with CM33 mousse (thickness 10mm) and are upholstered in the fabric of your choice. The panels are attached to the profiles with velcro.

Fabrics

Available in all Drisag fabric groups.
