Product description

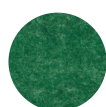

Our FeltTree is a reusable Christmas decoration designed for easy assembly and compact storage. Each tree consists of two recycled PET felt panels that simply slide into each other and can be taken apart just as quickly, allowing the tree to be stored flat and reused year after year.

Available in different sizes, from Desk models to Floor models, our FeltTree brings festive charm to any space. Mix and match heights and colours to create your own combination, while the recycled felt helps improve the acoustics of the room.
