

Breakdancer

design by James Van Vossel

Work pleasure by Drisag

Breakdancer

design by James Van Vessel

Product description

This chair will never get boring. In an instant you can transform this chair so that you can sit, relax, lie down or work in the desired way. You can easily turn both parts on the outside, giving you four completely different configurations. Another nice feature is that the middle part has a rounding that makes dynamic sitting possible.

Technical information

The base consists of three plywood carcasses, all covered with foam and upholstered. These parts are held together by powder-coated metal brackets and one of these is provided with a powder-coated metal base.

Fabrics

Available in all Drisag fabric groups.

Metal color

K40 - black RAL9005
